

WHOLE SCHOOLING

Raising the Standard for ALL

April 29 - 30, 2005

**HIGH LEARNING FOR ALL,
INCLUSIVE SCHOOLING,
CITIZENSHIP, AND COMMUNITY!!**

**Concordia University
College of Alberta**

Schools today include students with wide differences in cultural, racial, religious, and linguistic roots; family structures; socioeconomic status; language; students with mild to severe disabilities and those considered gifted and talented; and more! Such diversity is both a challenge and opportunity.

How do we teach such diverse students and strengthen learning and growth for all, not just some? How do we include diverse students in learning together, rather than separating them by culture, language, or ability? How do we create schools and classrooms where care and belonging are the foundation for learning? How do we have meaningful accountability that moves beyond standardized test scores? How can schools be places where students learn how to be citizens who create more just communities?

COME PARTICIPATE IN AN EXCITING INTERNATIONAL CONFERENCE

that will engage participants in learning, sharing, and action planning. Presentations by deep thinkers, masters of their craft, internationally recognized leaders. Engaging, facilitated, inspiring dialogue! Concrete, practical strategies AND exploration of key issues and challenges.
